

PROFESSIONAL SUMMARY

Data analyst with hands-on experience in data collection, cleaning, preprocessing, and visualization using Python(Pandas and Numpy), SQL and Power BI, eager to support the development and testing of machine learning models. Brings strong analytics thinking and a consistent willingness to learn new concepts across real-world projects and internships.

EDUCATION

Madanapalle Institute Of Technology & Science Bachelor of Technology; GPA: 7.78[Pursing]	Madanapalle, India August 2023 - August 2027
Narayana Junior College Intermediate-MPC; Percentage: 91.9%	Anathapur, India June 2022 - June 2023
Hyderabad Public School Schooling;Percentage:98%	Anathapur, India June 2020- June 2021

SKILLS

- Technical:** Python, SQL, Pandas, Numpy , Seaborn, Matplotlib, Scikit-learn, XGBoost, data collection, data cleaning, data preprocessing, machine learning.
- Tools:** MySQL, Excel, Power BI, Jupyter Notebook, Visual Studio Code, Streamlit.
- Soft Skills:** Team Leadership, Analytical Thinking, communication

INTERNSHIPS

DATA ANALYST INTERN ELAVATE LABS Link	April 25- May 25
- Led end-to-end data analysis using Python(Pandas and Numpy), SQL, Excel, and Power BI—automating workflows and reducing reporting time by 20%. - Designed dynamic dashboards and visualizations that drove insights into sales, category trends, and customer behavior. - Optimized data pipelines and collaborated across teams, boosting productivity by 15% and aligning analytics with business goals. - Extracted actionable insights from real-world datasets, strengthening data-driven decision-making across multiple projects.	

PROJECTS

Global Youtube Statistics Dashboard LINK	April 25- May 2025
- Analyzed 8,500+ global YouTube records Of dataset by cleaning, preprocessing, and handling missing data. - Performed EDA using Pandas, NumPy, Matplotlib, and Seaborn to identify trends and patterns. - Built visualizations to analyze views, subscribers, categories, and country-wise performance. - Generated actionable insights to support content strategy, audience targeting, and channel growth decisions.	
Tomato-Disease-Detection-APP LINK	
- Developed a tomato disease detection system using deep learning to classify plant disease from leaf images. - Built and trained a CNN-based model to identify multiple disease categories with high accuracy . - Implemented image preprocessing and model evaluation to improve prediction performance. - Designed an application interface to help farmers detect diseases early and support better crop management decisions.	

CERTIFICATES

● Python (Geeks for Geeks)	March 2025
● SQL and Database(Geeks for Geeks)	April 2025
● Data Analysis and Visualization with Power BI (Microsoft)	August 2025.
● Master Machine Learning for Data Science & AI	January 2026
● Python for DataScience	January 2025
