

EDUCATION

Madanapalle Institute Of Technology & Science
Bachelor of Technology; GPA: 7.78[Pursing]
Narayana Junior College
Intermediate-MPC; Percentage: 91.9%

Madanapalle,India
August 2023- August 2027
Kolkata, India
June 2021 - June 2023

SKILLS SUMMARY

- **Languages:** Python, SQL, JAVA (Intermediate)
- **Frameworks:** Pandas, Numpy, Scikit-Learn, Matplotlib, Seaborn
- **Tools:** Power BI, Excel, PowerPoint, MySQL
- **Platforms:** Jupyter Notebook, Visual Studio Code
- **Soft Skills:** Team Leadership, Analytical Thinking, communication, Problem Solving

WORK EXPERIENCE

DATA ANALYST INTERN | ELAVATE LABS | [LINK](#) **April 24- May 24**

- Led end-to-end data analysis using Python(Pandas and Numpy), SQL, Excel, and Power BI—automating workflows and reducing reporting time by 20%.
- Designed dynamic dashboards and visualizations that drove insights into sales, category trends, and customer behavior.
- Optimized data pipelines and collaborated across teams, boosting productivity by 15% and aligning analytics with business goals.
- Extracted actionable insights from real-world datasets, strengthening data-driven decision-making across multiple projects.

PROJECTS

Grocery Sales Analysis | [LINK](#) **December 24- January 2025**

- Cleaned and analyzed 8,500+ records, handling missing values and standardizing data.
- Performed EDA using Pandas, Matplotlib, and Seaborn to identify key sales trends.
- Visualized sales by year, item type, outlet type, and location using charts and plots.
- Derived insights to enhance marketing strategies and product placement decisions.

Retail Business Dashboard | [LINK](#) **April 25- June 2025**

- Cleaned retail data and calculated sales, profit, and profit margin using SQL queries.
- Conducted data validation, correlation analysis, and statistical techniques to detect outliers and generate actionable business
- Built interactive Power BI dashboards to trend analysis, visualize KPIs, categories, and seasonal trends.
- Enabled stakeholders to filter insights by region, season, and product category.

Tomato-Disease-Detection | [LINK](#) **August 25- Sep 2025**

- Developed a tomato disease detection system using deep learning to classify plant disease from leaf images.
- Built and trained a CNN-based model to identify multiple disease categories with high accuracy .
- Implemented image preprocessing and model evaluation to improve prediction performance.
- Designed an application interface to help farmers detect diseases early and support better crop management decisions.

CERTIFICATES

Python Programming - Skill Up | [CERTIFICATE](#) **January 2025**

- Built strong foundation in Python programming concepts including variables, loops, functions, and object-oriented programming.
- Worked on data structures, file handling, and problem-solving using Python.
- Applied Python for data analysis basics and automation tasks.

SQL - Skill Up| [CERTIFICATE](#) **March 2025**

- Developed strong understanding of SQL queries, joins, filtering, aggregation, and database management.
- Practiced writing efficient SQL queries for data extraction and analysis.
- Learned concepts including GROUP BY, subqueries, functions, and relational databases.

Data Analysis and Visualization with Power BI (Microsoft - Coursera)| [CERTIFICATE](#) **June 2025**

- Learned data visualization, dashboard creation, and business intelligence reporting using Power BI.
- Gained hands-on experience in data cleaning, transformation, and interactive report building
- Worked with Power Query, DAX basics, charts, KPIs, and data modeling techniques.
