OBJECTIVE

Data analyst with hands-on experience in data collection, cleaning, preprocessing, and visualization using Python(Pandas and Numpy), SQL and Power BI, eager to support the development and testing of machine learning models. Brings strong analytics thinking and a consistent willingness to learn new concepts across real-world projects and internships.

EDUCATION

- B.Tech in Computer Science and Engineering-Data Science
Madanapalle Institute Of Technology & Science | 2023–2027
CGPA: 7.82
- Intermediate (Board of Intermediate Education, Andhra Pradesh)
Narayana Junior College | 2021–2023
Marks: 919/1000
- Secondary School Certificate (SSC), Andhra Pradesh
Hyderabad Public School | 2020–2021
Marks: 588/600

TECHNICAL SKILLS

- **Languages:** Python, SQL, JAVA
- **Frameworks:** Pandas, Numpy, Scikit-Learn, Matplotlib, Seaborn.
- **Tools:** PowerBI, Excel, Jupyter Notebook, Visual Studio Code.
- **Soft Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Communication, Leadership.

PROJECTS

Retail Business Dashboard

- Cleaned retail data and calculated sales, profit, and profit margin using SQL queries.
- Conducted data validation, correlation analysis, and statistical techniques to detect outliers and generate actionable business insights.
- Built interactive Power BI dashboards to trend analysis, visualize KPIs, categories, and seasonal trends.
- Enabled stakeholders to filter insights by region, season, and product category

Grocery Sales Analysis

- Cleaned and analyzed 8,500+ records, handling missing values and standardizing data.
- Performed EDA using Pandas, Matplotlib, and Seaborn to identify key sales trends.
- Visualized sales by year, item type, outlet type, and location using charts and plots.
- Derived insights to enhance marketing strategies and product placement decisions.

INTERSHIPS

DATA ANALYST INTERN | ELAVATE LABS

- Led end-to-end data analysis using Python (Pandas and Numpy), SQL, Excel, and Power BI—automating workflows and reducing reporting time by 20%.
- Designed dynamic dashboards and visualizations that drove insights into sales, category trends, and customer behavior.
- Optimized data pipelines and collaborated across teams, boosting productivity by 15% and aligning analytics with business goals.
- Extracted actionable insights from real-world datasets, strengthening data-driven decision-making across multiple projects
